City of Austin Internship

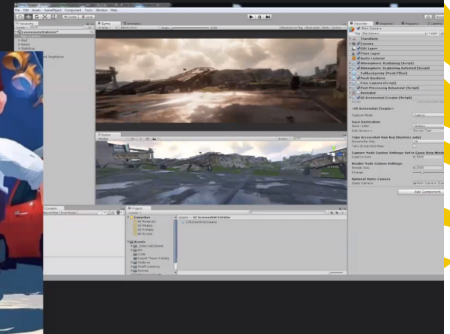

The City of Austin called for applications for paid internships for high school students 15 years or older. Students who are getting Remind messages from us have been applying and may get these great jobs full of professional experience!

Coding: Python Certification

What is Game Design?

- The art of crafting experiences
- Combines both creative and technical skills
- Goes beyond just making a game

Students did so well in our Python Coding class this Spring for game development that we decided to add another session in the summer! If you're interested, please send an email to eandera@lnesc.org.

Senior Corner

Attention Seniors! You will be receiving graduation cords and an honorary certificate with your college/university on it from LNEESC. **To qualify a senior must have done the following:**

- Completed a college application
- Completed FASFA
- Passed all classes
- Received an acceptance letter from a college or university

Ford Driving Dreams Program

The Ford Motor Company is currently supporting the educational goals of our students with a \$5,000 grant to fund our STEM education efforts in partnership with LULAC. We are very excited to be working with students on STEM-related education including:

- **Exposure to STEM careers with talks from scientists, medical-professionals, engineers, military experts, coders, and more.**
- **Summer coding camp! Only 5 days each month for June and July.**
- **Fun STEM activities.**

LNEESC Scholarship

We know that going to college can be very expensive and stressful. This is why we encourage seniors to apply for scholarships to help pay for educational costs. Visit our national website at **www.LNEESC.org** to browse scholarships from companies such as Exxon Mobil, Macy's, and more.

Career Exploration Highlight: Law

LNEESC High School students were able to attend a career workshop headlined by presenter and Attorney, Matthew Acosta. The presentation outlined his exciting journey from a young, Hispanic high school student who disliked English class to a Baylor Law School student, working on arguments for a famous Supreme Court case. **His #1 tip? Join clubs and organizations that allow you to interact with people.** Learning how to speak to people and interact is a great asset for anyone wanting to become an attorney. He did not start out very social, but through practice, he became a great communicator. Practice by getting involved!

Matt Acosta, Intellectual Property Attorney and Senior Partner from Dallas's Law firm, Platt, Cheema, and Richmond PLLC.
